

Text transcripts of sounds located in core-sounds-en.txt in

<http://downloads.asterisk.org/pub/telephony/sounds/asterisk-core-sounds-en-wav-current.tar.gz>

The sounds below have been added to the other core language sets since the last update of the en_AU set.

Only in en: with.wav
Only in en: you-entered.wav
Only in en: your.wav

Those are all currently in the English core set. Most of them were added in one large update. It is very rare that we add new core files, especially that many. Then, we also have some recent updates that are pending to be added in. I'll add the file names and text transcriptions below.

confbridge-binaural-on.wav: "3D audio enabled."
confbridge-binaural-off.wav: "3D audio disabled."
